SatyaSetu

WhatsApp PDF Verification Test Document

Purpose

This PDF is a sample document for testing SatyaSetu's WhatsApp document-verification flow. Send this PDF to your SatyaSetu WhatsApp bot and check whether it extracts the claims, verifies them, and returns a result with supporting evidence.

Test instructions

1. Open WhatsApp and open your SatyaSetu bot chat.
2. Attach this PDF as a document (not as a screenshot).
3. Send it and wait for the verification response.
4. Check whether the bot identifies the test claims and provides a verdict and evidence link.

Claims to verify

Claim 1 — Government / public policy

The Government of India has officially declared that every Indian citizen will receive ■50,000 in cash by registering on a website.

Claim 2 — Science

The Earth completes one revolution around the Sun in approximately 365.25 days.

Claim 3 — Digital safety

A website asking for your bank OTP over an unsolicited WhatsApp message may be attempting to steal your credentials.

Expected test behavior

The bot should treat each statement as a separate claim where supported, avoid assuming the document is trustworthy, and provide verdicts based on reliable evidence. It should not treat this sample PDF itself as proof.

Note: These statements are included for system testing. The bot's actual verdicts should be based on its evidence and verification process.
